# WHAT IS A SMART CONTRACT

Finally, A smart contract is a peer-to-peer transfer of cryptocurrency funds....that is it goes directly from one community member to another without ever going to “a third party” then out.

- A smart contract, once programmed can never be changed, manipulated, altered or compromised.
- A smart contract pays instantly.
- A smart contract only requires a BNB cryptocurrency wallet address to sign up, not personal information.
- The smart contract is an IDEAL platform for a program such as MyInfinity.
